PRODUCT SPECIFICATION SHEET

High-Performance Drum Liners (Standard & Anti-Static)

1. PRODUCT OVERVIEW

Our drum liners are designed for industrial steel drums to prevent contamination and corrosion. Made from high-quality **PE+PP** materials, they comply with **RoHS & Halogen-Free** standards.

Standard Series: Semi-transparent appearance, surface clean & smooth, free from oil stains or contamination.

Anti-Static Series: Permanent anti-static properties for hazardous environments.

Surface Resistance: $1 \times 10^5 - 1 \times 10^9 \Omega/\text{sq}$ (Tested by ASTM D257-2014).

2. TECHNICAL SPECIFICATIONS

Model No.	Capacity	Color / Type	Inner Diameter (mm)	Height (mm)	Weight (g)
LC10	10 Liters	Black / Semi-Transparent	230±1	280±3	50±5
LC20	20 Liters	Black / Semi-Transparent	286±1	345±3	65±5
LC200	200 Liters	Semi-Transparent	571±2	860±5	500±10

3. GENERAL INFORMATION

Material Composition: PE (Polyethylene) + PP (Polypropylene).

Application: Applicable to steel drums; Anti-static versions provide isolation with permanent anti-static properties.

Storage Guidelines:

Store in original packaging (plastic bags or cartons).

Avoid direct contact with moisture, sunlight, and water.

Protect from chemical aerosol contamination.

Packing Markings: Includes Product Name, Specification, Quantity, Manufacturer Name, and Production Date.
